Procurement of works for reconstruction, extension and functional adaptation of educational facilities in Subotica, Serbia

Europe (non-EU), Serbia (SER)

Reference number: RCF/SER/300061/W/2025/001, RCF/SER/300081/W/2025/001

Lot 1 - School of Chemistry and Technology Subotica, Serbia

Lot 2 - Polytechnic School in Subotica, Serbia

The answers to requests for clarifications received by the potential bidders to the following e-mail address: procurement@rcf-wb6.org

Q1	In BOQ for LOT 2 - Polytechnic School in Subotica, Serbia (FA 300081), there is no carpentry work but in Annex 3 (Graphic design documentation) there are schemes for windows and doors. Please define should we give a price for carpentry works in accordance with the schemes or it is not the subject of this tender. If these works are the subject of this tender and if we need to give a price, please correct the BOQ to be in line with the graphic documentation.
A1	There is no joinery work. It is not the subject of this tender.
Q2	In BOQ for LOT 1 - School of Chemistry and Technology Subotica, Serbia (FA 300061) there is carpentry work but in Annex 3 (Graphic design documentation) there are no schemes. Please provide us with schemes for windows and doors.
A2	The document „300061 –Schemes for windows and doors” has been published.
Q3	In BOQ, for LOT 1, part: 3. CONCRETE WORKS, position 3.1: “Construction of unreinforced concrete strip foundations for stairs, disabled access ramp, and platform, concrete grade MB 30. The foundations shall be reinforced in accordance with the design, details, and structural calculations. Concrete shall be placed over a previously spread 10 cm thick gravel layer. The concrete shall be placed and cured in compliance with applicable standards. The unit rate shall include all necessary labour, tools, machinery, and the gravel sub-base layer. Measurement: per cubic metre (m ³)” In one place, unreinforced concrete is mentioned, and in another, that the reinforcement should be aligned with the design. Please define whether it is reinforced or unreinforced concrete.
A3	It is unreinforced concrete.
Q4	In tender dossier if we want to apply for both parties (LOT`S) do we fill the forms from the tender documentation such as statements, declarations, qualification information for each LOT separately or together for both LOT`S?
A4	If a bidder submits an offer for both LOTs, the forms and documents that are common for both LOTs (e.g., statements, declarations, etc.) do not need to be submitted separately and may be provided once. Separate forms should be submitted only where the tender dossier requires LOT -specific information or documents logically linked to a particular LOT. Please refer to Corrigendum No.1

Q5	If we are applying for both parties (LOT 1 and LOT 2), can for example one engineer with a 450 license or 430 licence fulfill the requirement for both parties, given that the facilities are across from each other and that is a very realistic situation?
A5	Specified in Corrigendum No.1
